

1. Air one serves me as a resident by giving me something to listen too that has a postive message about life and how to live it. But most importantlt to me it share the message of hope that is found in Christ and how His love is and can change live no matter what is going on in life. I know that it has support me through the hard times in life as well as many others.

2. I feel very strongly that if this station is pushed aside and overridden by another station the hope that pepople need at that very second will be gone. The other stations that are out there do not in my opinion promote hope, peace and love that can be found in a relationship with Christ. They prompte degrading things that bring people down. I also personally support this station every month with my monies because of the message of Christ. You can try to get rid of Christ in many ways but He will reveal Himself in Bigger ways.

3. I feel that this station is in the public intrest because it promotes that love of Christ in a non-offensive to people who would other wise not want to hear. It has also changed the lives of many who wanted to end-their life, becuae they saw no hope in their time of crises. At that moment a song of encouragement came on, the person listened and changed their mind. I know that other stations would not promote a postive message of hope with a positive outcome. I feel very strongly that if this station is overridden it would be a terrible lost to the community and the State of Oregon as a whole.

Thank you,  
Cheree Kline
